Standard support

Why do you need to use a support, and in which case are they necessary ?

- Training on hard support with pikes or Free Link and their creation. The first part of this training will show you how to create those supports when the second part will concentrate on their removal when they need to be removed.
- The last part will concentrate on their interest when it comes to firing. 2 case studies will be seen during this session.

A must do for any Ceramaker user looking

How to use Build-It?

Can I completely prepare my files for printing with it?

Answer those questions and more with this training exploring all functionalities from the Build-It plugin with different case studies.

Learn how to use our revolutionary plugin for the Ceramaker Printing Software (CPS)

Available on : *C100 EASY* / *C900 FLEX* / *C3600 ULTIMATE*

MATERIALS

Nitrides - Alumina - Zirconia - Oxides*

4 people online
From beginners to experts

What can you do with each of the material printable on your machine ?

- All the general properties and applications for each of those materials the printing specificity and techniques illustrated with our 20 years of printing.
- From the cad file to the sintering all the tips that you need to know to succeed with your 3D printing process

A must when you want to try a new material or to learn more about the different ceramics

*All available 3DMix oxide portfolio

TBC

TO GO FURTHER

Project management, costing and 3D benefits

4 people online from
a service bureau

TBC

How to cost a part accurately ? How to manage a new part project with or without a customer ? What benefits to SLA 3D printing ?

- This training will go through all the different cost stages in a production project of ceramic pieces by SLA. We will introduce some tools and calcul sheet that you will be able to take away at the end of the training. Two case studies with different implications will be presented and studied.
- Learn all the tips from the very beginning of the project, the acceptance of the part down to the costing itself, the fabrication of the customer order and the archives.

**A must for any service bureau to benefit from 3DCeram Sinto
20 years know-how**

Available on : *C100 EASY* / *C900 FLEX* / *C3600 ULTIMATE*
