New Harmony >> New Solutions™

AUTO CERAKLEANER

An automated cleaning machine for 3D-printed ceramic parts that combines **high-speed cleaning** with drastically **reduced operating costs**.

The future of automation is moving on!

Powered by 3DCeram Sinto. **Maximizing yield.**

The AUTO CERAKLEANER reduces OPEX thanks to **solvent longevity** and active recycling. Achieving your **CSR goals**, it generates **less waste** and ensures a smooth transition **from printing to sintering**. It is the key to safe, automated, and reliable production.

- Tailor-made fixtures on 3DCeram Sinto know-how
- Protects teams by eliminating manual solvent contact
- Ready-to-sinter parts with very short operator time
- Higher throughput than standard CERAKLEANER
- Gentle cleaning eliminates green part breakage risk
